Education

Jose Rizal University Mandaluyong City
Bachelor of Science in Computer Engineering (Undergraduate Student) Expected Graduation: 2027

Experience

Cognizant Technology Solutions Manila, Philippines
IT Support Intern January 2026 – March 2026

- Managed daily IT tickets via ServiceNow, resolving hardware/software issues independently
- Performed OS imaging and device provisioning for company-configured laptops
- Conducted daily AV and equipment checks across 5–7 conference rooms
- Monitored network connectivity via server room checks and resolved connection issues
- Guided and oriented incoming interns on team workflows and IT procedures

Leadership & Activities

Jose Rizal University Mandaluyong City
Role: Team Lead and Host, "From Skills to Clients: Your First Step into Freelancing" October 2025

- Led the planning and hosting of a university seminar introducing students to digital freelancing and client acquisition.
- Coordinated with the guest speaker and faculty for event preparation and logistics
- Served as emcee, facilitating discussions and maintaining audience engagement

Achievements

Champion – IoT Competition (JRU CSE Week)

- Led a team in developing an IoT-based system integrating sensors and microcontrollers for real-world applications
- Recognized for innovation and teamwork during the Jose Rizal University Computer Engineering Week

Certifications and licenses

- CompTIA ITF+ (Information Technology Fundamentals) Certified
- AWS Academy Graduate – Cloud Foundations (Oct 2025)
- AWS Academy Graduate – Cloud Web Application Builder (Nov 2025)
- Certificate of Completion - Generative AI Workshop
- Certificate of participation – Empowered Workforce, Stronger Nation: A Labor Education Seminar for Graduation Students

Skills & Interests

Programming & Software: Arduino, Python, C++, Networking Concepts, Circuit Design, Software and Hardware Troubleshooting, Microsoft Office suite, HTML/CSS, Java, Canva, ServiceNow, Flash, Linux/Raspberry Pi, Git/Github
Soft Skills: Communication, Critical Thinking, Time Management, Leadership, Creativity, Problem Solving
Language: English (Fluent), Filipino (Native)
Technical Experience: Microcontroller Programming, IoT Device Prototyping, Sensor Integration
Interests: Embedded Systems, Automation Projects, Artificial Intelligence, Event Hosting, Game Development

Projects

Flood Monitoring System (AI + Computer Vision)

- Trained a custom computer vision model to classify flood levels (Normal/Warning/Critical/Overflow)
- Integrated dual-camera conditional logic with a Flask dashboard and live GSM SMS alerts
- Stack: Python, Flask, Teachable Machine, GSM Module | GitHub: github.com/Jner2
